- 1992              Starts own practice in Johannesburg

### Sam Pellissier Architect CC

During the past fifteen years, this practice designed and developed numerous projects including churches, schools, smaller hotels, lodges, office buildings, office parks and houses. Projects varying from small holiday house to multi million rand developments.

This practice is also involved in the restoration, remodelling and restructuring of houses, churches and offices.

The practice also has experience in architecture in sensitive natural settings and historic locations such as World Heritage Sites, eco estates and historical neighbourhoods.

The practice is skilled in the application and utilization of energy in buildings. The application includes the panning, construction and management.

The practice, in co-operation with Standard Bank Properties and Equity Estates, re-zoned and developed the office park "Peter Place Park" in Bryanston, Johannesburg. Sam Pellissier initiated and managed the project from concept phase to rezoning to construction of the office buildings.

Sam Pellissier has excellent experience with several developers with regard to negotiations concerning the acquisition of properties and the consequent re-zoning. For example where single residential properties are re-zoned to higher density residential properties and commercial projects.
